TO: Dave Crawford SCOM	FROM: Vic Ziegler WATR	DATE 5/9/86	TIME _____
SUBJECT GM Plant Wentzville, Mo.			
SUMMARY OF COMMUNICATION <p>Vic called and said he was working on gasoline spill from this facility. Had specific question but also needed to explain what was going on at at the site.</p> <p>GM has gas tank & gas line for putting gasoline in new cars as they are parked and stored before shipped from the plant. Gas line leaked and resulted in loss of gasoline. (Vic thought it was unleaded). GM proposes to remedy the situation by using subsurface bacterial degradation of the gasoline. To do this they will have to inject some chemicals into the ground to enhance bacterial degradation action.</p> <p>Project is being managed by MDNR DGLS. WATR got involved because the injection of the chemicals for treatment may be regulated by UIC. Vic wanted to know whether or not gasoline was a hazardous waste or substance & whether or not these actions might be regulated by our program.</p> <p>I told Vic gasoline, & other petroleum products are excluded from CERCLA. However it was possible 7003 of RCRA could be used if endangerment posed by the spill was severe enough. Suggested he would have to ask RCRA whether or not RCRA would regulate this as treatment. Suggested he call Marc Rivas, Mo. coordinator for RECM. Also suggested he might call Faye Sandberg RCRA to see what LUST might do on this. However after talking to Faye I believe LUST will have no involvement in such cases until regs are effective and programs (in states) operational.</p>
